

two-tone temptation advanced class

You learn best by doing. That's why Young Nails offers the best hands-on training in the business to help you learn new techniques, improve your skills, manage your time and make more dough. We offer lots of classes throughout the year, so keep an eye open for these fliers or ask your distributor for info.

Description: So you've already taken Two-Tone Temptation and can sculpt in your sleep. What's next to rock your salon? This is. We start out right away (no basic stuff to warm-up with) by teaching you the inside tricks on how to perfect the Reverse Technique. Late morning it's time to undo the bad habits you learned in school or developed all on your own. Good habits make for a long, healthy, profitable career. After lunch, you'll work in pairs applying what you've learned and there will be intense walk-around instruction by your Young Nails Mentor. There's no place to hide and we're here to make sure you get the technique down flat. The class we recommend after this is Need for Speed, which this class is a pre-req for.
